
24" Widescreen dual input LCD monitor with narrow bezel and height adjustable stand.

Get into the details

The contrast between light and dark colours on the screen is what makes images stand out. The bigger the difference between light and dark, the more vibrant images will appear. With an amazing dynamic contrast ratio of 50,000:1 you'll enjoy sharp image quality that makes your content come to life.

5ms Response Time

5ms (milliseconds) is the time that it the pixels to turn from grey to grey or black to black. The lower the response time, the faster the speed and the less blurring when you are watching fast moving video files or games.

Narrow Bezel

The narrow bezel gives you maximum screen size in the smallest space. This functional design is perfect when using multiple monitors, as it enables you to sit them side-by-side, making it easier to read information on both screens at the same time.

Adjustable Stand

The longer you spend in front of your monitor, the more important it is to have your monitors at the correct height and angle. This ergonomically designed HAS stand enables you to adjust the height, pivot, swivel and tilt of the monitor to make sure it is in the most comfortable position.

Widescreen

Widescreen is the future of visual display. It enables you to view more information on a single screen, in the same way as your plasma, LED or LCD TV does. The 16:10 aspect ratio enables the resolution to be increased to 1920 x 1200, making sure the image is of the high quality you would expect from Samsung.

MagicBright 3

MagicBright 3™

Control your screen's display with just one click. MagicBright 3™ automatically optimises brightness, contrast and gamma correction, based on the mode you choose.

CERTIFIED FOR Windows Vista™

Windows Vista Premium

Windows Vista Premium certification is only granted to monitors that satisfy stringent Microsoft compatibility tests before they qualify for the logo.
